Felix

CLIENT BRIEF

2026.09

AI & software delivery

Independent developer in Wuxi. Enterprise software delivery and React/TypeScript development.

Start with one concrete task

Examples to discuss; the scope follows your actual requirements.

Your situation	A possible deliverable	How we check
Repeated manual work	One workflow connecting your existing tools.	Agreed samples, review steps and clear failure messages.
Scattered documents or data	Document Q&A with sources, or extraction to a usable table.	Check answers or fields against reference samples.
A broken or missing feature	Diagnosis and repair, a new feature, or a scoped prototype.	Run agreed scenarios and record the results.

Also available: practical AI coaching and research or document deliverables.

How we work

01 Understand

Share the current process, a sample and the desired result.

02 Agree

Confirm feasibility, deliverables, acceptance, timing and price.

03 Deliver

Check the result and hand over the agreed files and guidance.

Personal project

RAGX explores document Q&A with sources, knowledge retrieval and evaluation.
